

# Mountain Region - DAS Project Manager

**Job Type:** Full-time

**Position:** DAS Project Manager

**Work Location:** Mountain Region (UT Base)

## Description:

Anchor Com, LLC is hiring to fill an open DAS Project Manager role. We are seeking a highly motivated and independent individual who is comfortable managing multiple DAS and communications related projects and exhibiting confident team leadership. 5 years of related work experience is required. The DAS Project Manager will be involved in overseeing and planning projects from start to finish. Site audits, project bids, and project budget statuses are part of the responsibilities of this position. The DAS Project Manager will work with customers and project team members for coordination of installation and all other project tasks through completion. This position is based out of our North Salt Lake, UT office which supports Anchor Com's Mountain Region. This position may require travel within the Mountain Region and occasional support to other Anchor Com markets. The ideal candidate is seeking an opportunity to grow their individual career in the DAS/ ERCES industry, has interest in being a part in the team efforts of delivering only the best solutions to potential customers, and is motivated in assisting in the overall growth of Anchor Com.

## Responsibilities:

- Show up on time with positive attitude
- Assist with staffing for support of installation crews
- Provide Customer Service timely, professionally, and friendly
- Leading and mentoring less experienced team members
- Provide Quality Control for field work and deliverables
- Communicate with project stakeholders and provide the direct interface for the customer
- Professional communication with site contacts
- Scheduling and facilitating project meeting and/or calls are required
- Oversee site documentation and completion
- Communication with Field, Design, Warehouse, Technical Teams at Anchor Com
- Monitor and Report project status, progress, and budget
- Help track change orders or changes in scope of work
- Prepare bid packs including labor and materials
- Track Red Lines for As-Build documentation
- Coordination of site tasks and resource planning
- Attend and keep current on product and testing certifications per project requirements
- Execute projects and tasks fully within Anchor Com's goals, visions, and culture
- Attention to detail and understanding of performance and aesthetics
- Always keep a good attitude
- Plan and Provide Scope of Work for tasks and projects
- Enforce Anchor Com policies and culture

### **Preferred Skills and Experience:**

- Ability to read and understand prints, drawings, and specifications
- 5 years related work experience.
- Knowledge of general installation and cabling standards
- Very good communication skills
- Low Voltage & Communication Cabling Project Experience
- Terminating and Testing procedures for Fiber Optic Cables and Assemblies
- Terminating and Testing procedures for 50Ohm coaxial Cables and Ancillary components
- Experience working with multiple DAS OEMs (Past Certification Recommended)
- Experience with RF and Optical Test Equipment (Past Certification Recommended)
- Experience working on Carrier Grade DAS Deployments
- Experience with Deploying Public Safety ERCES and Related Codes
- Good Troubleshooting Skills
- Motivated and capable of working independently
- Experience Working in and around active construction sites
- Ability to run multiple crews and experience adapting resources
- Knowledge of DAS components and general connectivity
- Past Experience with Commissioning and Optimization support
- Understand and Follow Safety Procedures
- Current OSHA 10 or OSHA 40 training is preferred

### **Qualifications**

- Very Good familiarity with Office Suite (Word, Excel, Outlook)
- 5 Years working in the DAS or Small Cell industry
- Experience organizing resources
- Understanding of DC voltage
- Experience with Sales and Customer Service
- Experience or familiarity with iBwave Design documents
- Knowledge of test standards (PIM, RL, OTDR, etc)
- Positive Experience leading crews and project supervision
- Understand functions of RF and Optical Test Equipment
- Ability to execute plans and adapt where needed
- Experience with P&L reports and budget tracking
- Experience with record keeping and documentation
- Understanding and ability to read blueprints, iBwave Drawings, and specifications

### **Salary and Benefits:**

Anchor Com is in the position to fill this role with a competitive salary which is suitable for the experience of the individual and matches the required responsibilities.

This position is eligible for additional benefit packages which include but are not limited to medical, dental, life, and disability insurance, as well as paid personal time off and holiday pay.
